

Never Married Population in California

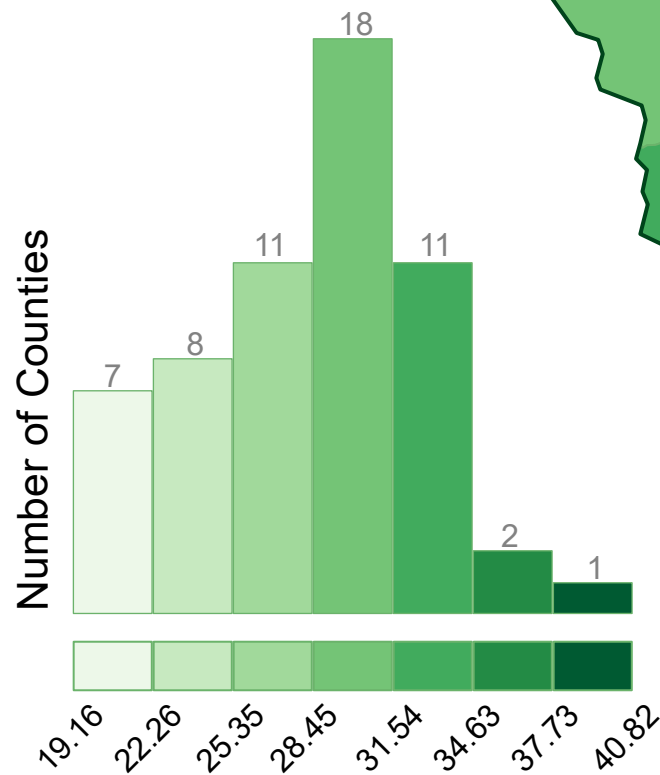

By County - 2025

Highest and Lowest Percentage of Never Married Population by County (Top 5)

Distribution of Never Married Population (age 15+)

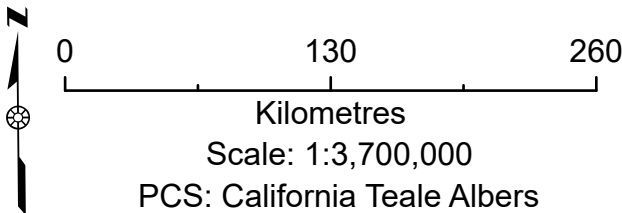

This map displays the percentage of the adult population (age 15+) who have never married across California's 58 counties in 2025. Darker shades indicate higher never-married rates. The distribution reveals a clear urban–rural gradient: coastal and metropolitan counties, particularly San Francisco (40.8%) record the highest rates, while rural Sierra Nevada and foothill counties record the lowest. Seven equal-interval classes (GVF = 0.96) were used to classify the data.

Classification method: Equal Intervals
GVF: 0.96

Geographic Metric	Urban Outlier (San Francisco)	Rural Outlier (Sierra County)
Never Married % (2025)	40.82% (Highest in CA)	19.16% (Highest in CA)
Median Age	40.0 Years	54.7 Years
Ages 65+ Population Share	15.40%	35.10%
Key Economic Driver	Tech, Finance, AI Boom	Tourism, Timber, Agriculture
Total County Population (2025)	837,055	3,768
