

JOHN ABBOUD, C.E.T.

GIS Technologist in Training - Bachelor of Applied Technology, Geographic Information Systems, SAIT

Calgary, AB · 403-477-3771 · john.abboud@proton.me · [linkedin.com/in/abboud-john](https://www.linkedin.com/in/abboud-john)

john-abboud.github.io

GIS technologist in training with 15+ years of experience in electronics and instrumentation across aerospace, oilfield, and utility industries. Skilled in spatial data capture, cartographic design, geoprocessing automation (Python/ArcPy), and remote sensing, with a technical background in precision troubleshooting, root-cause analysis, and documentation that carries directly into GIS data quality and field work. Seeking an entry-level or internship GIS position.

EDUCATION

Bachelor of Applied Technology, Geographic Information Systems - SAIT, Calgary, AB

2025 – Present

- Coursework in cartographic design, spatial analysis, geodatabase design, GPS field data capture, remote sensing/classification, and geoprocessing automation (Python/ArcPy, FME, ModelBuilder)

Electronics Engineering Technology Diploma - SAIT, Calgary, AB

2009

- TAC-accredited program: circuit design and analysis, digital/analog electronics, microprocessor systems, wireless communications, and automated test & measurement; completed a capstone engineering design project

CERTIFICATION

Certified Engineering Technologist (C.E.T.) - Association of Science and Engineering Technology Professionals of Alberta (ASET), current

TECHNICAL SKILLS

GIS Software

ArcGIS Pro, QGIS, ArcGIS Online, ArcGIS StoryMaps, Experience Builder, Dashboards

Programming & Data

Python (ArcPy), SQL, FME, ModelBuilder, Excel

Spatial Analysis

Coordinate systems & projections, geodatabase design, spatial joins/queries, remote sensing & classification, cartographic design

Professional & Language

Troubleshooting & root-cause analysis, technical documentation, English & Arabic (fluent), French (advanced)

SELECTED GIS PROJECTS

- Automated Python/ArcPy geoprocessing scripts - cycling-network analysis by township (Toulouse, France) and ATS/DLS land-fabric import, clip, and GPS-point location workflow (Alberta)
- Supervised multispectral land cover classification (Sibbald Lake, AB) - 84.5% overall accuracy, supporting ecological sampling design
- Thematic cartography - choropleth, proportional symbol, and data-classification method comparison maps (GEOS 457)
- Capstone (in progress): Avalanche Trigger-Zone Digital Twin, Fernie, BC - supporting future drone-based avalanche control planning for CIRUS Lab, SAIT

Full project portfolio: john-abboud.github.io

PROFESSIONAL EXPERIENCE

ILI Field Technician

Jun 2024 – Jan 2025

United Pacific Projects · Calgary, AB

- Performed infield and shop-based maintenance, repairs, and cleaning on pipeline in-line inspection tools
- Travelled to remote sites to prepare inspection tools for surveys and advised on conditions affecting data quality

Electronics Repair Technician

Jul 2019 – Apr 2024

Arcfield Canada · Calgary, AB

- Tested, repaired, and maintained CF-18 avionics systems to component level using automated test equipment and approved repair schemes
- Calibrated test equipment to OEM specifications and maintained documentation under ISO 9001/AS9100 and Airworthiness standards

Wireline Electronics Technologist III

Jun 2009 – Mar 2019

Weatherford Canada Partnership · Grande Prairie / Red Deer, AB

- Diagnosed and repaired electronic and mechanical faults in wireline tools, performing preventive, corrective, and calibration maintenance
- Participated in root cause analysis, trained new hires, and managed spare parts inventory and on-call support

Electronic Bench Repair Technician

May 2008 – Aug 2008

Atco Gas · Calgary, AB

- Calibrated, repaired, and tested gas instruments and pipe locators, documenting all work for traceability

Electronics Technologist

Feb 2007 – Aug 2007

Guardian Telecom · Calgary, AB

- Assembled, inspected, and tested electronic circuit boards through soldering and mechanical assembly
